Re: Excellent Aluminum Work on our Cottage

Chris,

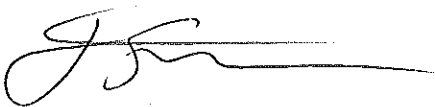

Thank you for delivery on time, as promised, as estimated and at the top end of my expectations of quality. You and your team installed our soffit, fascia, eaves trough (and gutter guard) in Gentek aluminum to match my new windows. You also clad my impossibly high-up and awkwardly positioned chimney in matching vinyl.

Unlike your other clients, I happen to have grown up running an aluminum company of my own in my teens back in Sudbury. I had a quality reputation of quality work, so I know what to look for. It's hard for me to say, but you did a better job than I even could have, with well executed, innovative ideas like:

- Straightening out my fascia with a false, hidden aluminum extension
- Angled fascia on gables for design and strength
- False Frieze (and clean caulking) above the siding at the gables
- Excellent workmanship with nearly invisible seams and screws

Thanks again Chris. Feel free to use my cottage as a reference work. I'll send some pictures in the spring to go with this letter.

Yours sincerely,

Frank Gerencser
